1. STATE CAPITAL PROGRAM

1.1 OVERVIEW

The State capital program comprises capital payments of both the Budget and Non Budget sectors.

Budget Sector capital payments include both gross fixed capital payments (purchase and construction of assets) and capital grants and advances made to Non Budget Sector agencies and to non State organisations. This is consistent with the Government Finance Statistics presentation of the overall Budget. Similarly, the Non Budget Sector includes in its capital payments, expenditure funded by grants provided by the Budget Sector. When data is presented for the total State capital program, the double count is eliminated.

This Budget Paper provides specific information on the overall State capital program and the Non Budget Sector component of the overall program. As well, detailed project information is provided on major works for both the Budget and Non Budget sectors. Information on Budget Sector capital payments on a policy area and Ministerial portfolio/agency basis can be found in Chapter 6 and Appendices B, E and F of Budget Paper No. 2 'Budget Information 1994-95'.

The State capital program can be depicted as follows -

	1993-94 ACTUAL \$000	1994-95 ESTIMATE \$000
BUDGET SECTOR	4,131,446	4,195,242
NON BUDGET SECTOR	2,194,596	2,990,562
	6,326,042	7,185,804
less: Grants to Non Budget Sector agencies (included within Budget Sector program)	1,153,198	1,084,221
STATE CAPITAL PROGRAM	5,172,884 *	6,101,583

* Excludes four major electricity councils included in the 1994-95 program for the first time (see p. 3).

References to real increases in capital program expenditure throughout this Budget Paper have been calculated using the Australian Bureau of Statistics Gross Non Farm Product deflator.

1.2 EXPENDITURE TRENDS

Real growth in State capital program expenditure occurred in 1989-90. Law, order and public safety, education, health and housing, water and sewerage, and the environment continued strong real growth but the major growth occurred in the provision of economic infrastructure, particularly transport and communication. Transport and communication expenditure was boosted by the implementation of the findings of the Booz, Allen and Hamilton study, aimed at providing a more efficient and effective rail system. Acceleration of the roads program was made possible by the introduction of the 3 cents fuel levy.

Real growth continued in the State capital program in 1990-91, particularly in the economic infrastructure areas of transport and communication and mining, energy and construction. The first full year effect of the 3 cents fuel levy contributed towards real growth in the roads program, included under transport and communication. Law, order and public safety also continued to grow strongly in real terms in 1990-91. The growth in mining, energy and construction related to an increased rate of expenditure on construction of the Mt. Piper power station and rehabilitation of existing power stations. Although housing, water and sewerage and the environment declined overall, the water and sewerage component increased due to the Government's priority to improve environmental protection, funded in part by the introduction of the \$80 per annum special environmental levy.

In 1991-92 there was a small real decline in the State capital program although housing, water and sewerage, and the environment and mining, energy and construction grew in real terms. In contrast to the trend of the previous few years, there were declines in law, order and public safety, education and health and in transport and communication. The contraction was largely the result of the completion of a number of major projects (particularly in the law, order and public safety policy area) as well as significant underexpenditure compared with budget in a number of policy areas.

The State capital program grew in real terms in 1992-93. The overall growth in the program reflected the Government's decision to provide a once-up increase to give some impetus to the depressed building and construction industry and economic activity in general and to promote employment. The major area of real growth was transport and communication, particularly in rail services and the roads program.

Following the once-off boost in the previous year, the State capital program again declined in real terms in 1993-94. However, real growth occurred in the policy areas of health, recreation and culture and economic services. Growth in recreation and culture reflected increased expenditure at Homebush Bay on sporting facilities associated with Sydney hosting the Olympic Games in the year 2000.

The 1994-95 State capital program is projected to increase significantly, reflecting increases in health, housing, water and sewerage, and the environment, and mining, energy and construction.

Initial work on the Rouse Hill development by the Water Board explains the increase in housing, water and sewerage, and the environment. The mining, energy and construction policy area is boosted in 1994-95 by the inclusion in the State capital program for the first time of four major electricity councils (Sydney, Prospect, Illawarra and Shortland) and the commencement of 'Discovery 2000', involving a major updating of the State's geoscience database to encourage mining industry exploration and investment. The significant increase in the health policy area is attributable to the implementation of the Concord and East Sydney strategies and increased reporting of own-source expenditure by area and district health services.

After adjusting for the inclusion of the four electricity councils, projected real growth in the 1994-95 State capital program is 8.6 per cent (the unadjusted increase is 15.1 per cent).

Over the five years up to and including 1994-95, the State capital program is estimated to increase by \$511 million or 9.7 per cent in real terms (after adjustment for electricity councils). The major areas of projected growth include the health, recreation and culture, and economic services areas. Lesser increases will occur in transport and communication and housing, water and sewerage, and the environment.

The growth in health services reflects the high priority accorded by the Government to improved targetting and health service provision in New South Wales. Significant health infrastructure projects have included the relocation of the Children's Hospital to Westmead, a major hospital enhancement program, the mental health plan and the information technology strategy.

The significant real growth projected in recreation and culture relates to the construction of Olympic facilities at Homebush Bay and additional support for the Arts portfolio.

Real growth in the economic services area is due, in the main, to increased expenditure in 1994-95 by the Workcover Authority on a new rehabilitation centre at Ryde.

1993-94 Program Outcome

State capital program payments in 1993-94 of \$5,173 million represented a decrease of \$306 million compared with budget, or 5.7 per cent in real terms compared with 1992-93 expenditure.

The decrease was largely explained by significant savings on budgeted payments by Non Budget Sector agencies through lower tender prices and the deferral of projects not providing the required rate of return (particularly in housing, water and sewerage, and the environment), although real growth occurred in the Budget Sector policy areas of health and recreation and culture (sporting facilities at Homebush Bay associated with the Sydney Olympics).

Detailed information on the outcome of the Budget Sector component of the State capital program in 1993-94 can be found in Appendix B of Budget Paper No. 2 'Budget Information 1994-95'.

Figure 1.1
STATE CAPITAL PROGRAM - TOTAL PAYMENTS

Payments expressed in real terms, 1994-95 base
Percentage change on previous year

* unadjusted for inclusion of electricity councils - adjusted increase is 8.6 percent

1.3 1994-95 PROGRAM

State capital program payments in 1994-95, estimated at \$6,102 million, represent an increase in real terms of 8.6 per cent on 1993-94, after adjustment for the inclusion of the four major electricity councils.

The State capital program represents planned expenditure at a point in time and, as with any plan, circumstances and priorities may change during the course of the financial year. In past years there have been moderate variations, either increases or decreases, between budgeted capital payments and the actual outcomes, reflecting a range of factors such as weather conditions, delays due to various reasons, price movements markedly different to those forecast and planning revisions.

While the 1994-95 State capital program has been framed on the latest estimates of planned payments on all of the projects that make up the program, past experience suggests it is not unlikely that the final outcome will follow the pattern of previous years and differ moderately from budgeted expenditure.

Highlights of the 1994-95 State capital program include -

- an increase of \$61 million or 15.3 per cent in real terms in health services, reflecting continued implementation of the Concord and East Sydney strategies and increased reporting of own-source expenditure by area and district health services;
- maintenance of education expenditure in real terms, with commencement of 45 new schools projects and 14 new TAFE facilities;
- payments totalling \$1,709 million for housing, water and sewerage, and the environment, including \$130 million for the Property Services Group Land Development Program, \$510 million for the Department of Housing and \$687 million for the Sydney Water Board;
- a total of \$656 million for mining, energy and construction, including \$346 million for electricity councils (Sydney, Prospect, Illawarra and Shortland) and \$10 million for the 'Discovery 2000' project aimed at improving and updating the State's geoscience database (estimated total cost \$40 million); and
- overall payments of \$2,211 million for transport and communication, including a roads program of \$1,450 million with \$104 million for road safety and blackspot programs, and \$506 million for passenger rail services with \$15 million for the New Southern Railway.

Funding of State Capital Program

Under the Government Finance Statistics presentation, Budget Sector capital payments are financed from Commonwealth specific purpose capital payments and hypothecated roads revenue, with the balance funded by the remaining current surplus and financing transactions.

The Non Budget Sector program is funded from the revenue, accumulated reserves of authorities and borrowings and assistance from the Budget.

Table 1.1 outlines funding sources for 1993-94 and 1994-95 for both the Budget Sector and Non Budget Sector programs.

Table 1.1: State Capital Program Funding Sources

BUDGET SECTOR

Commonwealth General Purpose Capital Payment

The general purpose capital payment was made up to 1993-94 under the Financial Agreement of 1927. Loan Council abolished this payment from 1 July 1994.

Commonwealth Specific Purpose Payments

The Commonwealth Government provides payments to the States for specific capital purposes under section 96 of the Constitution. The major payments are for public housing and roads.

Commonwealth specific purpose capital payments in 1994-95 are estimated at \$963 million, including \$307 million in housing grants under the Commonwealth State Housing Agreement, roads grants of \$329 million under the Land Transport Development program and payments of \$108 million under the 'Building Better Cities' program. Total estimated payments of \$963 million represent a decrease of \$42 million or 4.2 per cent over the previous year.

Hypothecated Revenues

Hypothecated revenues comprise proceeds from State fuel levies, including the additional levy to accelerate roadworks, and revenue from motor vehicle taxation. Both fuel levies and motor vehicle taxation are dedicated to the roads program in accordance with Government policy. Consistent with the principle of all taxation revenue being appropriated by Parliament, fuel levies and motor vehicles taxes are passed to the RTA through the Budget.

Funding from fuel levies and motor vehicle taxation dedicated to the roads program is estimated to amount to \$1,095 million in 1994-95 compared with \$1,149 million in 1993-94, a decrease of \$54 million or 4.7 per cent.

Current Budget Surplus and Financing Transactions

The residual funding sources for the Budget Sector capital program are the remaining current surplus, after hypothecation of roads revenue, and financing transactions and include an additional \$104 million for road safety and blackspot programs provided to the Roads and Traffic Authority.

NON BUDGET SECTOR

Borrowings

Borrowings to support Non Budget Sector capital program expenditure are estimated at \$155 million in 1994-95 compared with \$67 million in 1993-94. Agencies contributing to the increase in 1994-95 borrowings are the Waste Recycling and Processing Service (an additional \$14 million) and State Rail Authority - Commercial (an additional \$58 million).

Other Internal Funding

The most significant source of funding for the Non Budget Sector capital program is the income and accumulated reserves of authorities. In 1994-95 funding from this source is estimated at \$1,752 million, compared with \$974 million in 1993-94. The significant increase in the Water Board program (\$319 million) and the first time inclusion of the four electricity councils has increased internal funding of the program in 1994-95.

2. NON BUDGET SECTOR CAPITAL PROGRAM

2.1 OVERVIEW

The Non Budget Sector agencies provide major economic infrastructure assets such as water, power and public transport, and operate in markets ranging from monopolistic to competitive.

The Non Budget Sector capital program covers those agencies funded from own source revenues or borrowings. In addition, *capital grants* from the Budget Sector are provided to certain Non Budget Sector agencies to undertake services required by the Government for social rather than commercial reasons, for instance creating and maintaining free public recreation areas (Darling Harbour Authority), the provision of public rental housing (Department of Housing) and public rail transport (the City Rail and Country Link services of the State Rail Authority).

The Non Budget Sector capital program is primarily funded from internal agency sources. It is, therefore, mainly driven by commercial considerations including the anticipated rate of return on the acquired assets.

Unlike the Budget Sector Capital Program, the Non Budget Sector Capital Program has no direct impact on the State's Budget Strategy. However, in the sense that Non Budget Sector agencies pay dividends and tax equivalents which directly impact on the Budget result, there is an indirect relationship between the Non Budget Sector Capital Program and the Budget strategy. Accordingly, the emphasis on approvals for Non Budget Sector programs is on establishing that the proposed programs do not put at risk the agencies' ability to meet the financial targets stipulated in their Statement of Financial Performance.

2.2 EXPENDITURE TRENDS

Parallel with the growth in the State's total capital program, the Non Budget Sector component of the total program grew substantially in real terms in the early 1980's and reached a peak in 1984-85. This reflected significant real growth in economic infrastructure, primarily electricity generation, railways and ports.

Figure 2.1 above indicates the trends on Non Budget Sector capital expenditure over the past five years. (Expenditure is expressed in real terms using \$1994-95 as a base, the percentage change shown is the change on the previous year.)

Sectoral Trends

Energy

Before 1994-95, the energy sector comprised Pacific Power's capital expenditure as well as the global borrowing allocations of the State's 25 electricity distributors, which were used to partly fund their capital works programs. Historically, Pacific Power has dominated capital expenditure in the energy sector.

Pacific Power's capital works program has gradually declined from a peak of \$964.7 million in 1984-95 to a low of \$244.5 million in 1993-94.

Since 1991-92, Pacific Power's capital works program has stabilised following the substantial completion of the Mount Piper power station. In 1992-93 and 1993-94, Pacific Power's capital program focused on improving the environmental performance and extending the operating lives of its older power stations. This trend is anticipated to continue in 1994-95.

Pacific Power's share of total Non Budget Sector capital expenditure will decline from 20.9 per cent in 1991-92 to an estimated 7.5 per cent in 1994-95.

For 1994-95 (and future years), the total capital programs of NSW's four metropolitan electricity distributors (Sydney, Prospect, Shortland, and Illawarra) have been added to the energy sector. The global borrowing allocations for distributors' capital works programs now relate to the remaining 21 rural electricity distributors only.

In 1994-95, the combined capital works programs of the four metropolitan distributors will total an estimated \$345.9 million. One rural distributor, Southern Riverina Electricity and Water, will fund part of its total capital expenditure from a global borrowing allocation in 1994-95.

Housing, Water and Sewerage and the Environment

This sector's capital expenditure from 1989 reflects the increasing Government and community demands to meet effluent quality and environmental protection standards and to accommodate urban growth.

During the years between 1989 and 1995, this sector's capital works program has accounted for between 50 and 60 percent of the total Non Budget Sector capital expenditure.

The late 1980's was a period of real growth in the sector's capital expenditure. However, there was a small decline in 1990-91, when capital expenditure on housing was affected by delays in obtaining approvals for major housing redevelopment projects.

After a real decrease in 1993-94 caused by the impact of the recession, resulting in a more competitive environment (lower tender prices) and deferral of marginal projects, it is anticipated that the 1994-95 capital expenditure levels will be restored to their 1992-93 and 1991-92 levels of around \$1,300 million (or 55.7 per cent of the total Non Budget Sector capital expenditure).

Transport and Communications

The capital program expenditure of transport agencies has steadily increased from 1989 to 1994 following the implementation of the Booz, Allen and Hamilton study. In 1993-94 the transport and communication sector's capital program accounted for 33.4 per cent of the total Non Budget Sector capital program.

It is anticipated that transport's 1994-95 capital program will account for 30 per cent of the total Non Budget Sector capital program.

1993-94 Program Outcome

Overall, capital program expenditure by the Non Budget Sector in 1993-94 was \$2,194.6 million, \$296.7 million or 11.9 per cent below the original budget projection of \$2,491.3 million.¹ This development mirrors the impact of the recession on the general economy, resulting in a more competitive environment (lower tender prices) and deferral of marginal projects.

¹

Adjusted for Local Councils' Borrowings, not included in the 1993-94 actual capital expenditure.

2.3 1994-95 PROGRAM

The 1994-95 Non Budget Sector agencies' capital expenditure program is estimated to be \$2,990.6 million. This is an increase, in real terms, of \$742 million (or 33 per cent) on 1993-94 expenditure, and reflects the following changes to the program in 1994-95 -

- The four metropolitan electricity distributors are included in the Capital Program for the first time in 1994-95. These agencies will account for \$346 million of the energy expenditure in 1994-95.
- Rouse Hill Development: Stage I of this program involves infrastructure construction valued at \$254 million.

Adjusting for the effect of these programs, the 1994-95 Non Budget Sector Capital Expenditure Program would become \$2,390.6 million, an increase of \$142 million (or 6.32 per cent) over the 1993-94 Program Expenditure.

Major features of the 1994-95 Non Budget Sector Capital Expenditure Program, not mentioned above, include:

- Pacific Power's capital expenditure program will decrease from \$245 million in 1993-94 to \$225 million in 1994-95. Expenditure of \$123 million will be incurred for work on existing power stations, mainly Bayswater and Wallerawang Power Stations, to improve environmental performance and extend their serviceable life.

- The Water Board's capital expenditure program continues to reflect the increasing Government and community demands to meet effluent quality and environmental protection standards and to accommodate urban growth. Highlights of the 1994-95 capital expenditure program, (totalling \$433 million not including the Rouse Hill project), include -
 - Prospect Reservoir to Pipehead Delivery Upgrade - \$27 million to continue construction of the tunnel and pipeline to increase the capacity of the main delivery system and improve water quality;
 - Prospect Reservoir By Pass Stage II - \$9.3 million (estimated total cost \$60 million), will enable higher quality Warragamba water to be supplied to the northern and north western areas of Sydney. This project will be completed this financial year;
 - Telemetry (IICATS) - \$26 million IICATS is a large integrated telemetry system, which will provide monitoring and control of assets and infrastructure across the Board's area of operations;
 - Malabar Sewage Treatment Plant - \$10 million (of a total estimated cost of \$15.2 million), to provide improved plant and process performance;
 - North Head Sewage Treatment Plant - \$7 million, including commencement of the \$20 million upgrade to improve grease capture; and
 - St Marys Sewage Treatment Plant - \$13 million, (of an estimated total cost of \$74 million).
- The major components of State Transit Authority's \$27 million capital program are:
 - the Bus Replacement Program - \$14.6 million in 1994-95. This includes the purchase of the second set of 50 buses fuelled by Compressed Natural Gas (CNG); and
 - the purchase of an additional "Rivercat" vessel (\$3.5 million) to provide better passenger services between the City and Parramatta.
- Major Capital Works Initiatives for the State Rail Authority for 1994-95 (totalling \$541 million) include:
 - New Southern Railway - to provide a link between the City and Sydney's Kingsford Smith Airport, total estimated cost to the Government of \$474 million. Preliminary work to begin this year;
 - Parramatta to Hornsby Rail Link - total estimated cost to the Government of \$400 million, \$2 million has been allocated in 1994-95 for investigations and engineering studies;
 - Station Upgrading Program - further \$65 million allocated in 1994-95;
 - Funding allocation of \$58.6 million for the purchase of 80 outer suburban Tangara carriages. This will complete the Government's Tangara acquisition program;
 - Purchase of 28 Endeavour Rail Cars, costing \$14.2 million; and

- Purchase of four Explorer trains to boost capacity on Countrylink services to northern and southern regions, costing \$5 million.
- The Department of Housing's 1994-95 capital expenditure program of \$510 million is comparable to 1993-94's expenditure of \$511 million. Highlights include:
 - A construction program which will provide for the commencement of 3,105 units of accommodation;
 - Community housing programs to improve service performance for specific assistance schemes with an estimated cost of \$26 million;
 - A capital improvements (upgrading) program of \$47 million; and
 - A specific capital improvement program of \$11 million for the preservation of major residential buildings in the inner areas of Sydney.
- The highlights of Property Services Group's capital expenditure program include \$130 million for land acquisition development and sale, and \$96 million for the urban redevelopment of City West.

3. CAPITAL PROJECTS

3.1 INTRODUCTION

This chapter focusses on major capital works projects to be undertaken by individual Budget and Non Budget Sector agencies as well as their total planned capital payments from all funding sources.

For the purpose of this chapter a major work is any specific project with an estimated total cost of \$500,000 or more. Major works are further subdivided into new works (projects which have been approved to commence in 1994-95) and works-in-progress (projects which were commenced in earlier years but have not yet been completed). In addition an aggregate allocation for minor miscellaneous works (those with an estimated total cost of less than \$500,000) is shown for each agency.

As with any plan, circumstances and priorities may change in the course of its implementation. Ministers have authority to vary project allocations provided, in relation to Budget Sector agencies, they observe authorisation limits constraints (expenditure limits for the current and future financial years). Hence, the allocations shown against individual projects may alter during the course of the financial year.

Allocations earmarked for minor miscellaneous works are utilised for such purposes as the purchase of minor plant and equipment, annual provisions for repairs and replacements and land acquisitions, and the provision of capital services, including compensation for coal rights. Included for the first time in the 1994-95 State capital program are projects to be undertaken by four major electricity councils - Sydney, Prospect, Illawarra and Shortland.

Generally, the project values making up agency capital allocations for 1994-95 include allowance for price movements to 30 June 1995. The costs of projects proceeding beyond that point are not adjusted for future price movements, which would increase their total costs.

The 1994-95 capital program provides for expenditure, from all funding sources, of \$6,102 million, a real increase over 1993-94 of 15.1 per cent, or 8.6 per cent after adjustment for inclusion of electricity councils.

The capital program provides for the construction, acquisition and upgrading of the physical assets of the State, as well as the provision of certain services with long term social and economic benefits. The program plays a key role in the growth and development of the State economy by providing the basic infrastructure required by industry and for urban and rural development throughout New South Wales. In addition the capital program encompasses the provision of essential social, recreational and cultural facilities.

The program embraces a large number of individual projects ranging from the acquisition of minor plant and equipment, through to provision of electricity, roads, rail, ports, hospitals, education and other facilities. The sheer volume of projects being undertaken precludes a detailed listing of all projects.

The completion date shown for each project in this chapter relates to the date the project is financially completed, including the payment of all retention monies. In some instances, particularly for very large projects, this may be some time after the physical completion of works.

Separate indexes are provided for the Budget and Non Budget sectors programs, at the beginning of Sections 3.2 and 3.3 respectively.

DEPARTMENT OF MINERAL RESOURCES

PROGRAM OVERVIEW

The program provides for the updating and enhancement of the Department's geological and geophysical information on mineral resources in New South Wales, asbestos mine rehabilitation activities at Baryulgil and for the replacement and upgrade of plant, equipment and computer facilities. A significant major new work is to commence in 1994-95. The Discovery 2000 project involves the upgrading of the State's geoscience database and will cost \$40 million over four years. Its purpose is to promote mining industry exploration and investment in New South Wales.

DEPARTMENT OF WATER RESOURCES

PROGRAM OVERVIEW

The program is mainly directed towards flood security works at major storages, salinity and drainage works, the enlargement of Pindari Dam and the continuation of the Coomealla Pipeline project. The Department also participates in a number of joint programs such as the National Landcare Program and the NSW Queensland Border Rivers Commission program. Funding has also been provided for major programs to upgrade and restore town levees, and nutrient control works to minimise blue-green algal problems in inland rivers.

ROADS AND TRAFFIC AUTHORITY

PROGRAM OVERVIEW

The program provides for the Authority's role in managing the State's roads and traffic system, i.e. use of the system, maintenance of the network, and how it is enhanced, to ensure a roads and traffic system that is safe and efficient and integrated into a balanced transport system within the State.

The 1994-95 program reflects the Government's continuing commitment to dedicate all proceeds from motor vehicle taxation and State fuel levies to the roads program, including the additional three cents fuel levy.

NOTE:

Start dates are not shown since each project is an amalgam of individual works.

MAJOR WORKS

SYDNEY MAJOR ROUTES DEVELOPMENT

METROAD 1 - WATERFALL TO BROOKLYN VIA CITY

FALCON ST CONSTRUCTION OF CONNECTING RAMPS TO AND FROM WARRINGAH FWY	North Sydney	1999	6,094	164	30

CROWN TRANSACTIONS

PROGRAM OVERVIEW

The program meets the cost of various schemes to alleviate personal hardship and distress and to help primary producers, small businesses, councils and various voluntary non-profit organisations affected by floods, storms, bushfires or earthquakes.

The program also provides for the move of government agencies to the Governor Macquarie Tower Building and the fitout/refurbishment of government-owned buildings under the Government's CBD Asset Strategy, and includes advances to Non Budget Sector agencies and capital grants to the Property Services Group for capital costs relating to multi-occupancy office buildings and other Crown properties.

SYDNEY REGION DEVELOPMENT FUND

PROGRAM OVERVIEW

The Sydney Region Development Fund aims to facilitate the planning and development of metropolitan Sydney through identifying and financing land acquisitions required for future planning purposes. This has resulted in the development of significant community assets including regional open space and major freeways.

An amount of \$17.5 million has been allocated for land acquisitions by the Sydney Region Development Fund in 1994-95.

An allocation of \$1.3 million has also been included for Greenspace Grants for community open space enhancements.

DEPARTMENT OF HOUSING

PROGRAM OVERVIEW

The program focuses on the provision of public rental housing in NSW and home purchase assistance support on a needs basis.

The 1994-95 program provides for the completion of approximately 3210 dwellings which were in progress at June 1994 or which will be committed and completed during the year. Funding is also provided for land acquisitions for future public housing purposes and the capital upgrade of existing housing stock.
