**INDEX**

Substantial information is contained in published departmental Annual Reports and the "NSW Government Directory" concerning organisational structures, functions, senior officers and office locations. Information of this nature, which is sometimes contained in program budget documents in other jurisdictions, has not been duplicated.

## 2.2 Program Hierarchies

In the program structure, the various functions of an agency are classified according to their major purposes and then subdivided into various components.

Two hierarchies have been developed for New South Wales. The first hierarchy is goal orientated and is based on policy areas divided into policy sectors, which in turn are divided into programs. The policy areas and policy sectors broadly correspond to the Australian Bureau of Statistics dissections of government expenditures which themselves are related to international classifications.

To deal with the problem of expenditure authorisation, a second hierarchy has been developed which is related to Ministerial responsibility for Parliamentary appropriations. Terminology used for the levels in each hierarchy is as follows:-

### 1st Hierarchy (goal orientated classification)

Level I	Policy area:-	A broad aggregation of policy sectors representing the main areas of Government endeavour.
Level II	Policy sector:-	A grouping of related programs representing a particular direction of Government within a main area of Government endeavour.
Level III	Program:-	The principal building block where objectives are set to be achieved through a series of activities.
Level IV	Activity:-	A group of tasks which contributes towards the achievement of the objectives of a program.

### 2nd Hierarchy (organisational classification)

Level I	Ministerial Heading:-	The highest level at which funds are appropriated and includes administrative units and declared authorities within the Ministerial portfolio and within the Budget Sector.
Level II	Organisational Unit:-	Consists of an administrative unit or a declared authority in terms of the Public Sector Management Act and the Legislature; the head of each organisational unit is responsible for the control of funds and the exercise of economy in expenditure.
Level III	Program area:-	A grouping of programs with related goals.
Level IV	Program )	As under the 1st hierarchy above.
Level V	Activity )	

# INTRODUCTION

## 1. Background to the Estimates System

The annual budget of a government operating under the Westminster system represents the authorisation by Parliament of the payments proposed by the government of the day according to its policies and priorities. The budget is in fact an Act (generally termed an Appropriation Act) passed by the Parliament to give legal effect to those payments.

The essence of the appropriation process is the concept that "public moneys" can only be expended by the administrative arm of government under the authority of the elected legislative arm. The approach now adopted in New South Wales is that the budgetary process should clearly distinguish between those sources of funds which should only be used following approval by the Parliament (essentially those derived from taxation, Commonwealth grants, borrowings and certain other transactions of a "Crown" nature) and those funds earned by agencies through the sale of their services or through donations, industry grants, etc.

The former category of funds, those appropriated by Parliament, are treated as an income of the Consolidated Fund. The second category, which consists of user charges, grants from other agencies, donations etc, are, under net appropriation methodology, regarded as the income of the agency. The rationale for this is explained in Section 3.3.

Payments from the Consolidated Fund can only be made under the authority of Parliament. In general, this authority is given through the passing of the annual Appropriation Act.

The Appropriation Bill is introduced by the Treasurer and the Budget Speech is, in effect, the "second reading" speech of that Bill. The Bill (printed as Budget Paper No. 5) is supported by the more detailed "Budget Estimates" (i.e. this Budget Paper).

The estimates of payments are grouped together under the agency responsible for administering particular programs and these agencies are grouped under ministerial headings. All estimates are presented in program budget format.

## 2. Program Budgeting System in New South Wales

### 2.1 Background

Program budgeting was fully implemented in New South Wales in 1986-87 when all allocations from the Consolidated Fund (as shown in the Budget Estimates) were appropriated on a program basis. An outline of the background to and stages of implementation of program budgeting is contained in the introductory section in the 1987-88 Budget Estimates.

New South Wales has adopted a form of program budgeting which provides the information required for review of Budget priorities without sacrificing control of expenditure. The program structures that have been adopted are compatible with organisational boundaries.

The following chart provides a diagrammatic presentation of these two hierarchies.

On the following page is an example of a program structure showing the relationship between the two hierarchies.

### OBJECTIVES CLASSIFICATION

### ORGANISATIONAL CLASSIFICATION

### 2.3 Total Payments by Policy Area and Policy Sector

As outlined above, New South Wales has two program hierarchies. Details of total payments on a program basis for the first hierarchy (goal oriented) are shown in the Appendix to Budget Paper No. 2, "Budget Information".

At the foot of each program statement in this document, a reference is given to the policy area and policy sector in which the program is included:

### 3. Amendments to Estimates Presentation

The Budget estimates provided in this Budget Paper, whilst essentially the same as 1991-92, differ markedly in terms of presentation from those in previous years. This reflects the impact of the following factors -

- the adoption of *accrual accounting*, with 62 of the 65 Budget Sector agencies now converted to *accrual accounting and budgeting*;
- the transformation from an approach which concentrated largely on Consolidated Fund transactions to a comprehensive *total funds* approach which provides information on the use of cash resources from all sources; and
- the adoption of "*net appropriation*" budgeting whereby user charges and certain other forms of revenue are retained by agencies and shown as one of the sources of funds supporting the program (with the Consolidated Fund being the other principal source).

Details of these changes and the impact on the Budget Estimates are set out below, while the following section explains the format of the Budget Estimates tables in detail.

#### 3.1 Accrual Accounting and Budgeting

As part of the move to better reflect the amount of resources consumed by Departments, all organisations will be moving to accrual or commercial accounting over a period of three years. In 1990-91, four organisations were included on an accrual basis, while a further thirty eight departments were included in 1991-92. This year nearly all of the State's larger departments, including School Education, Police and Community Services, converted to accrual accounting. Effective from 1993-94, the remaining two agencies (Health and New South Wales Technical and Further Education Commission) and the "Crown Transactions" (see 3.4 below) will convert to accrual accounting. Accordingly in that year the full Budget will be presented on both a Government Finance Statistics cash basis and on an accrual accounting basis.

Whether an agency is on accrual or cash budgeting, each program and organisation statement shows, as the "bottom line", the level of Consolidated Fund cash payments.

#### 3.2 Format of Budget Presentation

Prior to 1991-92 the format of the Budget Papers had a Consolidated Fund focus at the Ministerial, organisational and line item levels, with provision of additional information on a total payments basis at the program level for individual organisations.

In 1991-92 this approach changed to focus on total payments in the case of cash budgeting agencies (or total expenses in the case of accrual budgeting agencies), being the only level at which detailed line item details are presented, as this is considered to better reflect the activities of agencies.

For agencies on accrual budgeting, total expenses are adjusted for expenses which do not result in cash payments (for example depreciation) and for movements in the level of accrued expenses, prepayments and inventories which have a cash impact in a different accounting period to that under consideration. For example, if unpaid expenses (creditors) increase in a year, the expense is recognised in that year but, as cash is not paid to those other entities until a following period, the level of expenses is reduced by the increase in unpaid expenses to determine the level of cash payments. Where unpaid expenses decrease, more cash is required to be paid out than the expenses for the year.

In order to compare agencies on cash budgeting with those on accrual budgeting, total payments are shown for all agencies.

With the introduction of net appropriation budgeting, agencies are entitled to retain own source revenues which were previously paid into the Consolidated Fund. Accordingly, Consolidated Fund appropriations now effectively comprise only one of several sources from which agencies fund their activities.

In line with the Government's adoption of a Government Finance Statistics approach to presenting State finances, to facilitate comparability of information between States, *outlays* figures are also provided for each program of a department and for the department as a whole. *Current outlays* principally represent total recurrent payments less user charges receipts while *capital outlays* principally represent total capital payments less total asset sale proceeds.

### 3.3 Net Appropriations

The term "net appropriations" refers to a system of budgeting introduced in New South Wales from 1 July 1991 whereby agencies are allowed to retain moneys they receive, other than taxes, fines and regulatory charges, as an offset to the cost of their programs, rather than having to pay them into the Consolidated Fund. (Net appropriations differ from outlays in that agencies may also utilise other own source revenues, such as grants from the private sector, and vary their level of cash balances to fund payments rather than use Consolidated Fund appropriations.)

Revenues eligible for retention are principally those obtained from the provision of goods and services, although other revenues such as grants, donations and contributions from the private sector or other government bodies may also be retained. The revenues retained under the net appropriation approach include -

- user charges such as hospital bed-day charges, TAFE administration charges, sale of publications, sale of prison industry products, search fees;
- donations and contributions from the private sector; and
- grants from other government agencies.

The advantages of net appropriations are threefold -

- agencies are encouraged to take a more commercial approach, where appropriate, in the provision of services;
- revenue generating activities are freed from restrictions such as the need to obtain Treasury approval to incur additional expenditure when client demand increases; and
- the Budget becomes more clearly the vehicle for Parliament approving the expenditure of the public purse (i.e. taxpayers' funds), as originally intended by the Constitution.

Consequently the level of payments which the Budget seeks to have appropriated from the Consolidated Fund is lower than it would otherwise be.

Additional details on the rationale and implementation of accrual accounting and budgeting were shown in Section 10.3 of the 1990-91 Budget Paper No. 2 and is also covered in Section 8.1 of the 1992-93 Budget Paper No. 2.

### 3.4 Organisational Restructures

Following a review of the activities of State agencies as part of the work of the Task Force on Classification of State Organisations, it was decided that a number of organisations should properly be classified as part of the Budget Sector.

In 1991-92 the State's cultural and environmental institutions, which were formerly treated as programs of the Ministry for the Arts (for example, the State Library, Australian Museum) and the Ministry for the Environment (for example the Royal Botanic Gardens), were included as Budget Sector organisations in their own right. This change was designed to acknowledge that while these bodies are created under statute they receive more than half of their operating budget funding from taxation revenue and hence Consolidated Fund support should be directly appropriated by Parliament.

Additionally in 1991-92 a new entity, "Crown Transactions", was created for Budget Estimates purposes to capture those payment transactions which essentially did not relate to the portfolio responsibilities of individual Ministers and their agencies. Transactions which are substantially outside the control of individual agencies, such as long service leave, superannuation and debt servicing costs, in general appear in the Crown Transactions statements. The philosophy behind this is that only items for which an agency can be held fully accountable should be reflected in its accounts. In the case of debt costs, for example, the level of borrowings for the Budget Sector is a policy decision of government, not of individual agencies, and hence debt costs are reflected as "Crown Transactions" rather than in individual agencies.

It was also clear that taxes and certain other revenues collected (for example, payroll tax, stamp duties, tobacco licence fees) do not represent revenues of the collecting agency in its own right.

Budget allocations for "Crown Transactions" appear under the appropriation for the Premier and Treasurer.

## 4. Explanation of Statements

### 4.1 Financial Estimates by Minister, Organisation and Program (pages 17 to 585)

Financial estimates are shown in the following format:

- Ministerial Appropriation Summary
- Organisational Summary
- Program Statements

These statements have been prepared for the Legislature and each Ministerial grouping of organisational units.

Ministerial Appropriation Summary: This summary contains details of the amounts to be appropriated by Parliament to organisations for which the Minister is responsible. These sums are classified by type of appropriation (i.e. recurrent and capital) under organisational units. These amounts agree with the allocations sought to be approved by Parliament through the passing of the Appropriation Bill.

Also included in the Ministerial Appropriation Summary is a table detailing the average number of staff employed by each organisation (expressed on an equivalent full-time or EFT basis).

Organisational Summary: The level of resources which are projected to be expended by each organisation which directly receives an appropriation by Parliament are detailed in this summary. For an agency still on cash budgeting, the level of *recurrent payments* by line item category is shown together with the manner in which these payments will be funded, for example user charges receipts, other departmental receipts, movements in cash balances and Consolidated Fund appropriations. Capital works and services payments are shown in total together with other transactions of a capital nature (for example advances made by the agency or repaid to it, capital revenues principally comprising net asset sales, and advances received by the department), and Consolidated Fund capital appropriations.

Agencies on accrual budgeting disclose the level of *recurrent expenses* attributable to each line item category. This differs from payments in that expenses are recognised when the agency obtains an economic good from an outside body (for example for the supply of materials) or incurs a liability, as opposed to when it physically makes payments in respect of those items.

In order for there to be a comparison with the recurrent activities of agencies on cash budgeting, from total expenses are deducted:

- expenses which do not involve a cash payment (for example depreciation);
- items which involve a cash payment in a later period, for example, an increase in accrued expenses (unpaid creditors); and
- items which involved a payment in a previous period (for example a decrease in inventories and prepayments);

Accordingly, for all agencies, whether on either cash or accrual budgeting, a comparison can be made at the level of total recurrent payments.

A further comparison can be made between agencies on cash or accrual budgeting at the level of Consolidated Fund recurrent payments. This can be achieved by deducting from the level of total recurrent payments:

- user charges revenues;
- other own sources of revenue;
- movements in the level of revenues owing to the agency but not received at the end of the year (the sum of this and the two previous items equals the level of cash received); and
- movements in cash balances.

Comparison can also be made at the level of capital activities between agencies on cash or accrual budgeting at the level of total capital payments by:

- deducting from capital expenses, items which involve a payment in a later period (increase in accrued expenses) or where assets acquired did not involve a cash payment (assets donated to the agency); and
- adding to capital expenses, items which involve a payment in the current period but the expense arose in a previous period (decrease in accrued expenses).

Comparisons can also be made between the capital programs of cash and accrual agencies at the level of Consolidated Fund support. The adjustments to move between these aggregates are identical for all agencies.

An example of the types of transactions involved in moving between cash and accrual budget presentations are detailed in the following table. The table is in the form of an accrual agency.

**BUDGET FORMAT**

<b><u>CATEGORY</u></b>	<b><u>SUMMARY EXPLANATION</u></b>
<b><u>RECURRENT EXPENDITURE</u></b> (accrual concept)	
Employee related Maintenance and working Depreciation Grants and subsidies Other services	Expenditure categories relating to when the agency becomes liable to make a payment (for example long service leave) or consumes economic resources (for example depreciation).
<b>Total Expenses</b> (accrual concept)	
Plus: Increase in inventories and prepayments Decrease in accrued expenses	Some expenses (for example depreciation) do not result in a cash payment. Others may result in a cash payment in a later year. Conversely, cash payments may be required in the year flowing from expenses of an earlier year. This group of items is designed to move from an accrual figure (i.e. expenses) to a cash figure (i.e. payments).
Less: Non funded expenses Decrease in inventories and prepayments Increase in accrued expenses	
<b>Equals Total Payments</b> (cash concept)	The amount of cash payments made by the agency on recurrent activities.
Plus: Increase in agency cash balances Increase in receivables	Total payments may be sourced either from the Consolidated Fund or from sources controlled by the agency. These agency sources may stem from user charges, donations or cash balances. This group of items is designed to move from a total payments figure to the total amount of payments which is met from the Consolidated Fund.
Less: User charges revenue Other sources of revenue Use of agency cash balances Decrease in receivables	
<b>Equals Consolidated Fund Recurrent Payments</b> (cash concept)	This is the level of cash support to the agency approved/proposed to be approved by Parliament for recurrent purposes.

**TOTAL CAPITAL WORKS AND SERVICES**  
**EXPENDITURE**  
 (accrual concept)

Plus: Decrease in accrued expenditure

Less: Increase in accrued expenditure  
 Non cash donations and industry  
 contributions

**Equals Total Capital Payments**  
 (cash concept)

Plus: Increase in agency cash balances  
 Purchase of investments  
 Advances paid to other organisations  
 Advances repaid to other organisations

Less: Use of agency cash balances  
 Sale of investments  
 Advances repaid by other organisations  
 Advances received from other  
 organisations

**Equals Consolidated Fund Capital  
 Payments**  
 (cash concept)

**Total Consolidated Fund Payments**  
 (cash concept)

**OUTLAYS**  
**Recurrent**  
 (cash concept)

**Capital**  
 (cash concept)

This is an accrual amount and represents the Budget Sector capital program including physical assets and grants to the Non Budget Sector and local government.

Some of the State's expenditure does not involve a cash payment in the year whilst other payments relate to expenditure in prior years.

The amount of cash payments made by the agency on the Budget Sector capital program including physical assets and grants to the Non Budget Sector and local government.

This group of items indicates payments sourced from funds other than the Consolidated Fund. In addition to the State's Capital Program this group includes other items of a capital nature (for example financing transactions).

This is the level of cash support to the agency approved/proposed to be approved by Parliament for capital purposes.

The total level of cash support to the agency approved/proposed to be approved by Parliament.

Principally comprises total recurrent payments less user charges receipts.

Principally comprises total capital payments less asset sale receipts.

Recurrent and capital cash outlays are provided at the bottom of the statement for the organisation. Recurrent outlays are principally total payments less user charges receipts while capital outlays principally comprise total capital payments less total asset sale proceeds.

Program Statements: Each program within an organisational unit is the subject of a separate program statement.

The statement includes narrative material - program objectives and program description - as well as staffing on an activity basis and summarised financial information.

The program title is relatively concise, the intention being that it convey sufficient information to enable an interested reader to grasp in general terms what government functions or responsibilities are subsumed under the program.

Program objectives are statements of the broad aims of the program and indicate why the State is involved in the area.

The program description explains the activities which are grouped together within the program. The program description differs from the program objectives in that it indicates how the program is undertaken, rather than why.

Under each program, activities are listed. The activities have concise titles which follow logically from the program description. The full range of activities within the program is covered although relatively minor activities may not be discretely specified.

For each activity, or in some cases group of activities, the staff level is noted. These staff figures represent an estimate of annual average staffing, including temporary and short term "casual staffing", expressed on an equivalent full-time (EFT) basis. They are a guide to the average number of staff (EFT) who might be employed during the year on a particular program based on the funds intended to be spent on the program as a whole, not only to that component funded from the Consolidated Fund. The figures include staff charged both to recurrent services and to capital works and services. Where program costs consist of contributions to other bodies (e.g. transport authorities), staff figures for these bodies are not included.

Recurrent resources allocated to the program are indicated in the operating statement whilst capital resources are detailed in the capital statement. These statements which vary in format between agencies on cash or accrual budgeting, follow the same format as that of the organisational summary except that "grants and subsidies" and "other services" items are dissected into categories indicating the nature of the item as opposed to being shown in aggregate.

Program receipts/revenue are detailed for each applicable program. Commonwealth funding and receipts of a "Crown" nature generated by activities within programs are shown, where appropriate, under the heading receipts paid into the Consolidated Fund. User charges retained by agencies are detailed by major category, with revenues detailed for accrual based agencies and receipts for cash based organisations.

Finally, the level of recurrent and capital outlays applicable to the program are also shown.

## **5. Budgetary Controls**

### **5.1 Forward Estimates**

In August 1989, for the first time, forward estimates of Consolidated Fund recurrent expenditures were released, covering the period 1989-90 to 1991-92. With certain minor adjustments, the 1990-91 estimates became the 1990-91 Budget allocations. Similarly the 1992-93 forward estimates published in the 1991-92 Budget Papers, again with adjustments, became the 1992-93 Budget allocations. Section 4.2 of Budget Paper No. 2 details the forward estimates for 1992-93 to 1994-95. The forward estimates enable an ongoing assessment of the Government's expenditure commitments relative to the Medium Term Financial Strategy and at the same time provide a financial framework within which organisations can develop broad financial plans.

The forward estimates are adjusted on a regular basis to reflect additional initiatives approved by Government. In November of each year the forward estimates, revised to reflect post Budget changes, and with the addition of one year, are advised to departments. The estimates are subject to review by Ministers and departments.

### **5.2 Global Budgeting**

In accord with the Government's policy of adopting a more global approach to budgeting, Ministers have been progressively provided with greater flexibility in moving funds between programs and line items.

With the change to a total payments presentation of the Budget from this year Consolidated Fund appropriations are no longer linked to individual line items or line item categories.

Ministers are now free (subject to any specific restrictions imposed by the Treasurer or the Minister for Finance) to utilise funds within each program as best achieves the program aims. Allocations may also be transferred between programs under delegation from the Minister for Finance.

Transfers are not to occur where the resulting changes are inconsistent with any relevant Government policy or where they create unsustainable future commitments.

### **5.3 Funding Transfers**

Ministers are able to seek approval of the Minister for Finance for the transfer forward of savings from the current year to the following year or the transfer backward from future years' allocations to the current year to cover a funding shortfall.

The transfer forward facility provides an incentive for departments which underspend their allocation in the current year to utilise such monies in the following year on adequately planned, once up items.

The transfer backward facility is directed at assisting departments to overcome problems associated with temporary funding shortfalls.

In both cases the amount that can be transferred is basically limited to a maximum of 2 per cent of the department's allocation and approval is on a case by case basis.

#### **5.4 Staff Number Monitoring**

As part of the budgetary process, an Average Staff Number and Year End Staff Number are advised by each Budget Sector entity.

The Average Staff Number is the average staffing level for the year as shown in the Budget Estimates while the year end staff number, is the projected staff number for the following 30 June, including casual staff and temporary assistance. Both staff numbers are calculated on the basis of full time equivalent staff numbers. For example, 10 temporary or casual employees each working for half the normal working week would be shown as 5 staff unit.

In line with increased controls placed on the funding available to agencies under the forward estimates system, staff number controls were abolished from 1 July 1991. Monitoring of staff numbers is continuing as an element in determining the ability of departments to live within the level of funds available to them and to track the results of the efforts of the Government at downsizing operations and improving efficiency.

#### **5.5 Reporting Requirements**

Budget Sector agencies report on a monthly basis on receipts/revenue, payments/expenses and staffing. The reports indicate the position for year to date and the estimates for the full year. Where there is a potential variation from the Budget estimate, departments are required to advise Treasury immediately, identifying reasons for the variation and indicating the remedial action to be undertaken.

---

Note: In order to allow comparison, for agencies moving from cash to accrual budgeting in 1992-93 the figures for those agencies shown as "Actual" for 1991-92 have been adjusted to place them on a consistent basis with the 1992-93 appropriations. The 1991-92 appropriations have not been so adjusted. The Public Accounts contain 1991-92 actual expenditures on a basis consistent with the appropriation for that year.

## MINISTER FOR CONSERVATION AND LAND MANAGEMENT AND MINISTER FOR ENERGY

**21 DEPARTMENT OF CONSERVATION AND LAND MANAGEMENT**21.1 Conservation and Land Management

## 21.1.1 Conservation and Resource Planning

Program Objective(s): To identify and assess the use and health of the State's land and forest resources and set strategic directions for their conservation, resource allocation and use.

Program Description: Assessment of the bio-physical and socio-economic characteristics of the land to obtain a clear understanding of its capabilities, appropriate uses and management. Provision of multiple purpose forest management. Mapping of physical features of the catchments. Prediction of likely effects of land degradation and long term sustainability measures on productivity of lands and forests.

## MINISTER FOR CONSERVATION AND LAND MANAGEMENT AND MINISTER FOR ENERGY

## 21 DEPARTMENT OF CONSERVATION AND LAND MANAGEMENT

## 21.1 Conservation and Land Management

## 21.1.2 Land Management and Administration

Program Objective(s): To manage and administer the State's land resources and to provide opportunities for the use, management and protection of land by the community.

Program Description: Management of the Crown Estate. Secure community participation in the conservation and management of the State's land resources, including the management of Landcare and Total Catchment Management Programs. Development of options for future land use, including sale and lease of Crown lands and the management of reserved land and State Recreation Areas. Development and implementation of products and services for the management, use and protection of land and farm water supplies, including contractual and consulting services.

## MINISTER FOR THE ENVIRONMENT

**28 NATIONAL PARKS AND WILDLIFE SERVICE**28.1 Conservation of Natural and Cultural Resources

## 28.1.1 Natural and Cultural Resource Management

Program Objective(s): To preserve, preferably in free-living and self-perpetuating populations, all species of plants and animals native to the State. To conserve examples of a complete range of natural environments and outstanding or unusual natural phenomena. To conserve and/or manage a representative sample of sites, structures or places of significance to Aborigines, of national historical significance or research value.

Program Description: Conservation, protection, restoration and other related resources management activities conducted at the field level. Promotion of the study, understanding and appreciation of wildlife, natural environments, Aboriginal culture and Australia's heritage generally. Encouragement and management of appropriate use and enjoyment of national parks. Preservation of the State's natural and cultural resources.

## ESTIMATES 1992-93

## MINISTER FOR LOCAL GOVERNMENT AND MINISTER FOR CO-OPERATIVES

## 39 DEPARTMENT OF LOCAL GOVERNMENT AND CO-OPERATIVES

## 39.1 Development, Oversight of and Assistance to Local Government

## 39.1.1 Development, Oversight of and Assistance to Local Government

**Program Objectives:** To promote an effective, efficient, responsive and accountable system of local government in New South Wales, advise the Minister, implement government policy and to administer the legislation assigned to the local government portfolio.

**Program Description:** Development of policy notions updating the structure and system of local government and provision of assistance and advice to councils and the public about local government administration. Distribution of moneys, received from the Commonwealth under tax-sharing arrangements to councils as well as oversight of council borrowings. Intervention in or control of certain activities of councils and individuals by means of approvals, proclamations, inquiries, licences, and certifications. Provision of administrative support services to the Department.

Activities:	Average Staffing (FTE)	
	1991-92	1992-93
Ministerial staff	12	12
Executive control	3	4
Review of Local Government boundaries	3	4
Financial control	12	13

## 41.1.4 Resource Policy

Program Objective(s): To formulate policy for coordinated development of the minerals sector in order to further the State's economic growth.

Program Description: Examination of broad issues affecting the mining industry. Development of appropriate policies and legislation. Review of legislative and policy developments of other agencies, the Commonwealth and overseas countries to assess their impact on mining and exploration. Coordination of policy development through Industry/Union/Government committees such as the Mineral Resources Development Committee and the Coal Resource Development Committee. Balancing of industry and community needs and expectations through planned and informal liaison with Councils and the community.

## MINISTER FOR POLICE AND EMERGENCY SERVICES

## 49 DEPARTMENT OF BUSH FIRE SERVICES

49.1 Funding and Administration of Rural Firefighting Services

## 49.1.1 Funding and Administration of Rural Firefighting Services

Program Objectives: To promote effective rural firefighting services within the State, including the co-ordination of bush firefighting and prevention activities.

Program Description: Development and implementation of training, education and publicity programs relating to bush fires. This program provides assistance to local government councils in the formation, equipping and maintenance of bush fire brigades. The State and councils contribute 25 per cent each and insurance companies 50 per cent.

## 51.2.1 Asset and Risk Management Services

Program Objective(s): To minimise Government and community liability in relation to the State's floodplains and coastal assets. To preserve and repair estuaries. To support the commercial fishing industry and recreational boating through the development and management of assets. To provide administrative and policy support services to the Minister and Government.

Program Description: Policy, legislative and technical services in relation to the development and management of the State's floodplains, estuaries and coastal assets. Provision of sites and infrastructure necessary to improve the recreational amenity of the State's waterways. Provision of financial assistance to local government in relation to such assets. The construction of port facilities for the commercial fishing industry. The provision of services to the Government including risk management and the development and implementation of appropriate building industry and asset management policies and strategies.

Program Objective(s): To limit future losses from damage by coastal and oceanic hazards by reducing the impact of those hazards on existing owners and to ensure that future development is compatible with those hazards. To preserve and improve the amenity of beaches and beach facilities and to promote effective management practices.

Program Description: Identification of the nature and extent of coastal and oceanic hazards. Provision of coastal engineering advice in relation to the management of these hazards and nearby areas. Provision of financial assistance to local government for investigation, design and implementation of hazard management measures and beach amenity improvements. Assistance to local government for coastal process studies and coastline management plans. Provision of policy, legislative and other services to Government.

## MINISTER FOR TRANSPORT AND MINISTER FOR TOURISM

## 65 TOURISM COMMISSION

## 65.1 Development of the Tourism Industry

## 65.1.1 Industry Facilitation

Program Objective(s): To ensure that key opportunities to grow or sustain tourism related business are identified and communicated to relevant organisations.

Program Description: Provision of assistance and guidance in planning, marketing, financing, selling and promotion of tourism. Co-ordinate the implementation of the initiatives contained in the NSW Government Tourist Development Strategy, conduct research into identifying broad trends relating to the tourism industry, including social, environmental and economic factors and their impact upon the industry. Develop and facilitate the implementation of Regional Tourism Development Strategies and Local Tourism Plans through the Commission staff in regional centres throughout the State.
